

# NIH Biomedical Technology Research Center for Macromolecular Modeling and Visualization

## **Overview of the Program**

**Introduction to MD in NAMD  
Introduction to Molecular Visualization in VMD**

**Free Energy Calculations  
Advanced Modeling Tools**

### **Goal:**

**Making users comfortable with the software environment**

**Tutorials – MUST MUST MUST**

**Emad Tajkhorshid**

**NIH Resource Center for Macromolecular Modeling and Visualization**  
Beckman Institute for Advanced Science and Technology  
University of Illinois at Urbana-Champaign

## Monday, July 17:

09:00	Application of molecular dynamics to biomolecular modeling	Emad Tajkhorshid NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
10:30	Coffee Break	
10:45	Ab initio protein structure modeling with Alphafold in VMD	Rafael Bernardi Department of Physics, Auburn University
11:45	Quick setup and analysis of NAMD simulations with QwikMD	Rafael Bernardi Department of Physics, Auburn University
12:15	Q & A	
12:30	Lunch Break	
14:00	Hands-on tutorial session I: VMD and NAMD tutorial	
15:30	Coffee Break	
15:45	Hands-on tutorial session II: QwikMD tutorial	

## Tuesday, July 18:

09:00	Enhanced sampling and free energy calculations in NAMD - Part I	Chris Chipot NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
10:30	Coffee Break	
10:45	Enhanced sampling and free energy calculations in NAMD - Part II	Chris Chipot NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
11:30	Free energy calculations at QM/MM level	Rafael Bernardi Department of Physics, Auburn University
12:10	Q & A	
12:30	Lunch Break	
14:00	Hands-on tutorial session I: Free energy and enhanced sampling tutorial	
15:30	Coffee Break	
15:45	Hands-on tutorial session II: Free energy and enhanced sampling tutorial	

Dr. M. Moradi replaces Dr. Chipot.

## Wednesday, July 19:

09:00	VMD+ Special features and capabilities	John Stone NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
10:00	Advanced visualization, figures and movies in VMD	Mariano Spivak NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
10:30	Coffee Break	
10:45	NAMD 3.0 features, performance and capabilities	David Hardy NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
11:45	Force field parameterization with FFTK	Mariano Spivak NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
12:15	Q & A	
12:30	Lunch Break	
14:00	Hands-on tutorial session I: FFTK tutorial	
15:30	Coffee Break	
15:45	Hands-on tutorial session II: PMF tutorial	

## Thursday, July 20:

09:00	Molecular simulation at the interface of biology and nanotechnology	Aleksei Aksimentiev NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
10:30	Coffee Break	
10:45	Multi-resolution simulations with ARBD	Christopher Maffeo NIH Resource for Macromolecular Modeling and Visualization University of Illinois at Urbana-Champaign
12:15	Q & A	
12:30	Lunch Break	
14:00	Hands-on tutorial session I: Modeling nanopores for sequencing DNA	
15:30	Coffee Break	
15:45	Hands-on tutorial session II: Other tutorial	

**Friday, July 21:**

09:00 TBD Rafael Bernardi  
Department of Physics, Auburn University

10:30 Coffee Break

10:45 Introducing Cybershuttle: A platform to launch and control simulation jobs in HPC Suresh Marru  
Cyberinfrastructure Integration Research Center, Indiana University

12:15 Q & A

12:30 Lunch Break

14:00 Hands-on tutorial session I: Cybershuttle tutorial

15:30 Coffee Break

15:45 Hands-on tutorial session II: Other tutorial

# Molecular Dynamics - A Key Tool in Biophysics and Beyond

Resource software is employed in **more than half of all MD papers** in Life Sciences

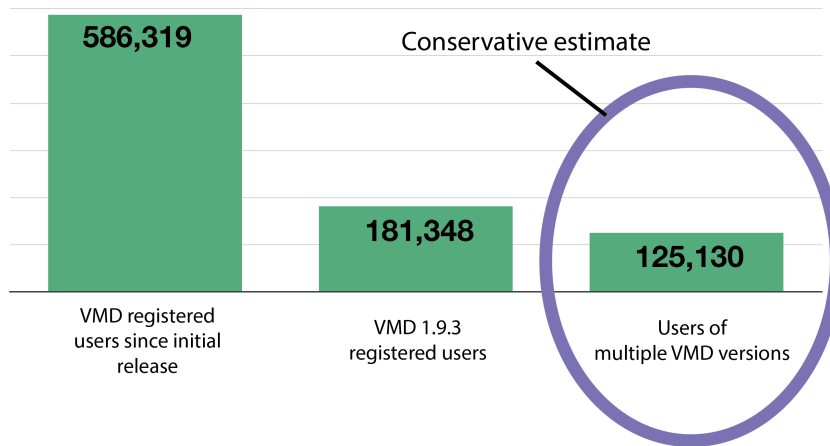

**NIH Resource Center for Macromolecular Modeling and Visualization**

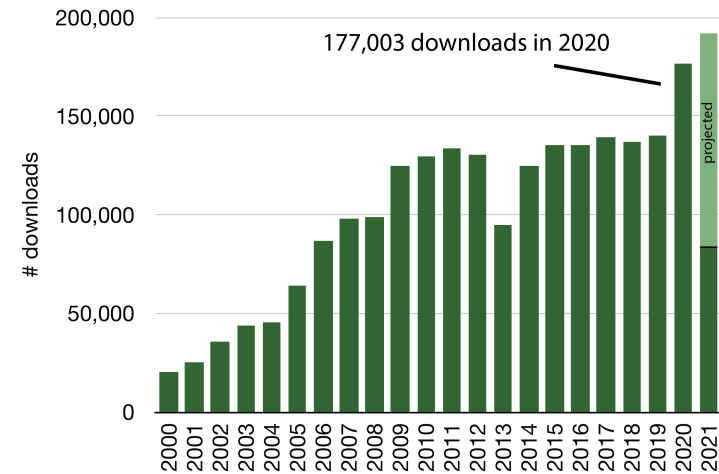

# NIH Biomedical Technology Resource for Macromolecular Modeling and Visualization

## Serving a large and growing community

a) Over 125,000 users of Resource software

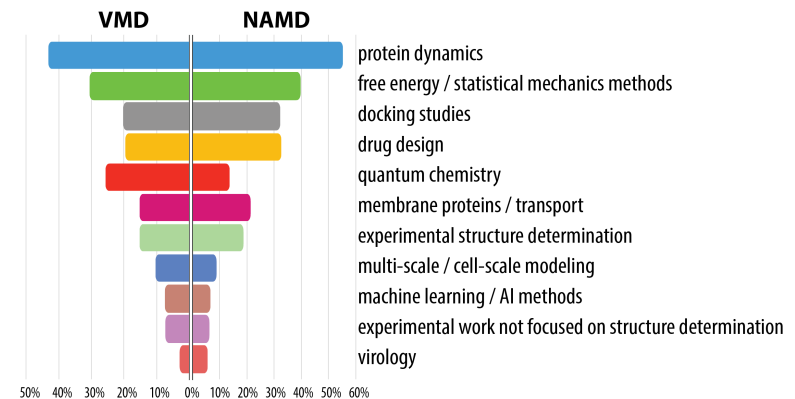

b) Over 2.2 million total downloads of Resource software

c) In 2018–2021 alone, Resource software has enabled over 3,700 publications in states throughout the US

d) VMD and NAMD are used in a broad range of biological fields

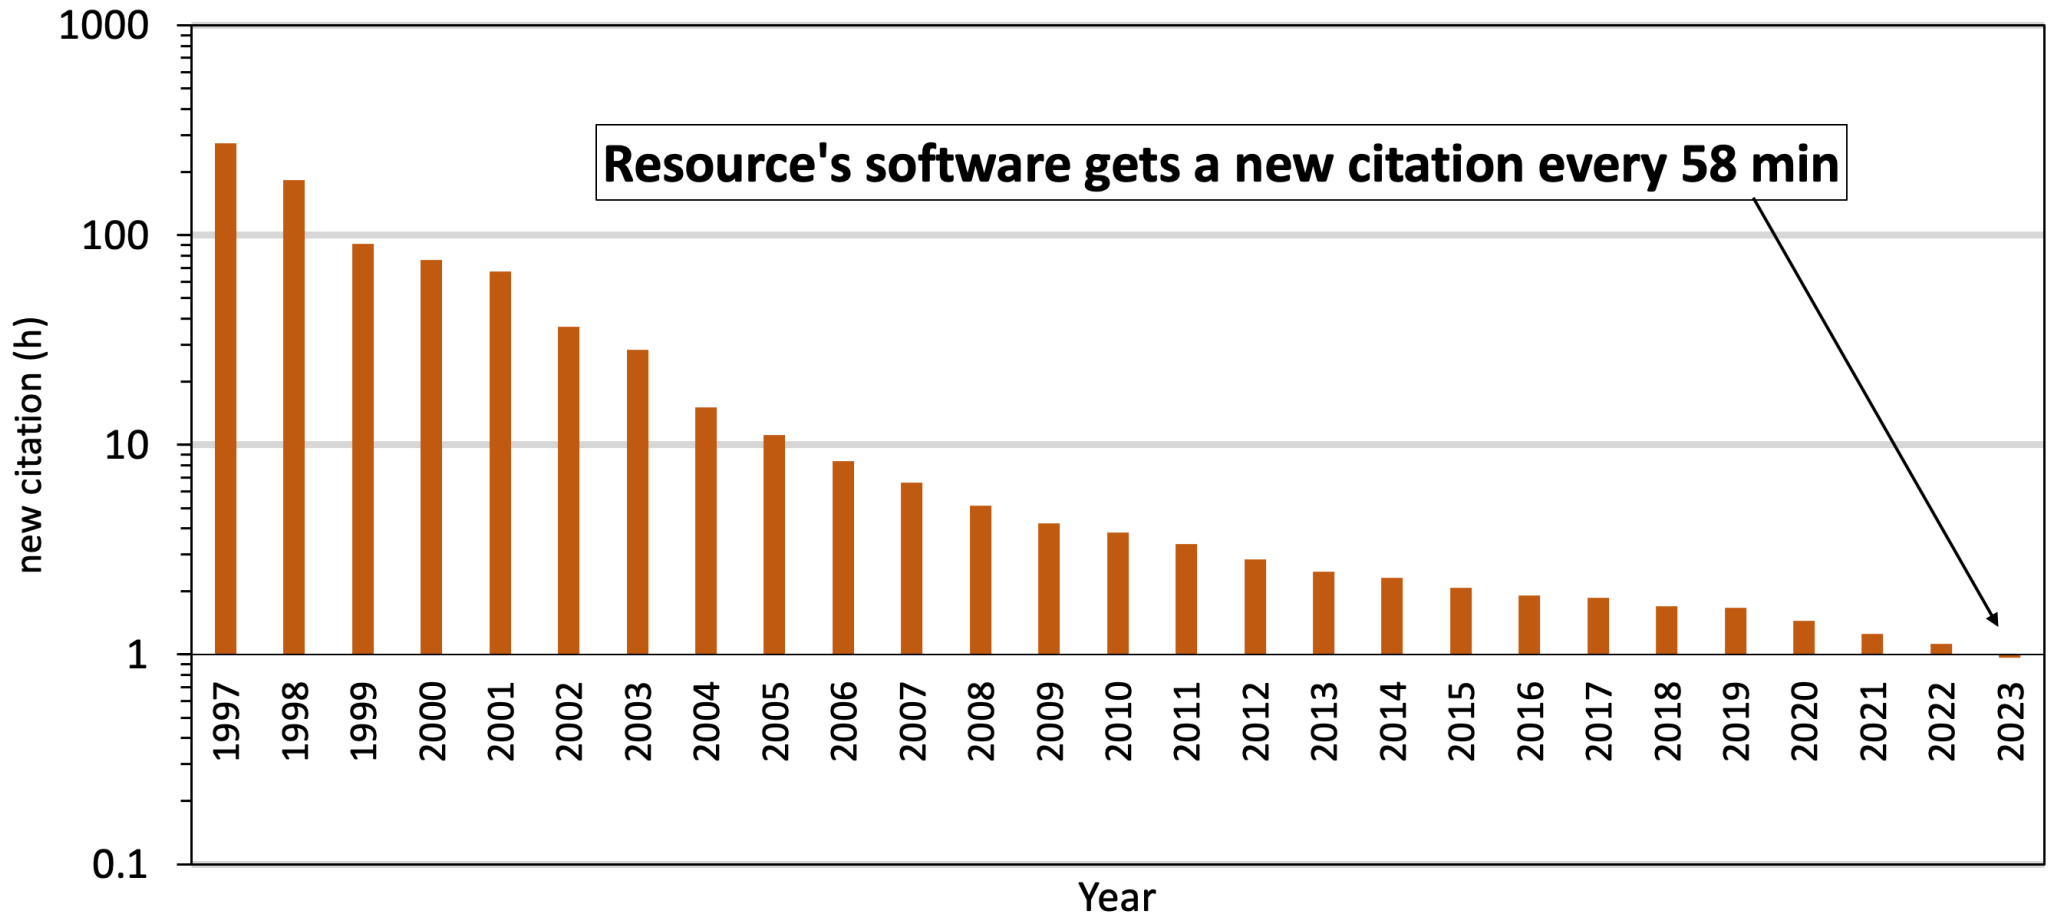

5-yr statistics: **1.4 million** web visitors; **228,000** tutorial views

# Serving a large and growing community

of biomedical researchers employing molecular modeling and simulation technologies

# Computational Structural Biology

## Describing Biomolecules at Nanoscale

**Structure / Dynamics**  
**@ nanoscale**

# Why Structural Biology at Nanoscale?

- ◆ Mechanisms in Molecular Biology
- ◆ Molecular Basis of Disease
- ◆ Drug Design
- ◆ Nano-biotechnology

Antidepressant binding site in a neurotransmitter transporter.  
Nature 448: 952-956 (2007)

# Why Structural Biology at Nanoscale?

- ◆ Mechanisms in Molecular Biology
- ◆ Molecular Basis of Disease
- ◆ Drug Design
- ◆ Nano-biotechnology

Binding of a small molecule to a binding site  
Y. Wang & E.T. PNAS 2010

# Why Structural Biology at Nanoscale?

0.00 us

Dror et al., PNAS 2011

# Why Structural Biology at Nanoscale?

- ◆ Mechanisms in Molecular Biology
- ◆ Molecular Basis of Disease
- ◆ Drug Design
- ◆ Nano-biotechnology

Structural changes underlying function  
M. Moradi & E. T. PNAS 2013

# Why Structural Biology at Nanoscale?

- ◆ Mechanisms in Molecular Biology
- ◆ Molecular Basis of Disease
- ◆ Drug Design
- ◆ Nano-biotechnology

Structural changes underlying function  
M. Moradi, G. Enkavi, & E. T. Nature Comm. 2015

# Nano-biotechnology Microfluidic Sensing Devices

Functionalized nanosurface with antibodies

**HIV subtype  
identification**

*Lab Chip 2012*

Created by **nanoBIO Node** tools

# Nano-biotechnology

## Gold Nanoparticles as Delivery Vehicles

Schematic model with  
no prediction power

Transmission  
Electron Micrograph

Yang, J. A.; Murphy, C. J.  
Langmuir 2012, 28, 5404–  
5416

Cartoon representation of lipid Au NPs

**Experiment:**  
Murphy Lab

**Modeling/Simulation:**  
Tajkhorshid Lab

# Applications of Computational Methodologies to Structural Biology

Simulation of the dynamics of the molecular system (MD)

- Calculating ensemble-averaged properties of microscopic systems to compare to macroscopic measurements
- Providing a molecular basis for function
- Describing the molecular/structural changes underlying function
- ...

Thermal fluctuations of a phospholipid bilayer

Hydration at the interface of viral shell proteins

Membrane binding of a coagulation protein

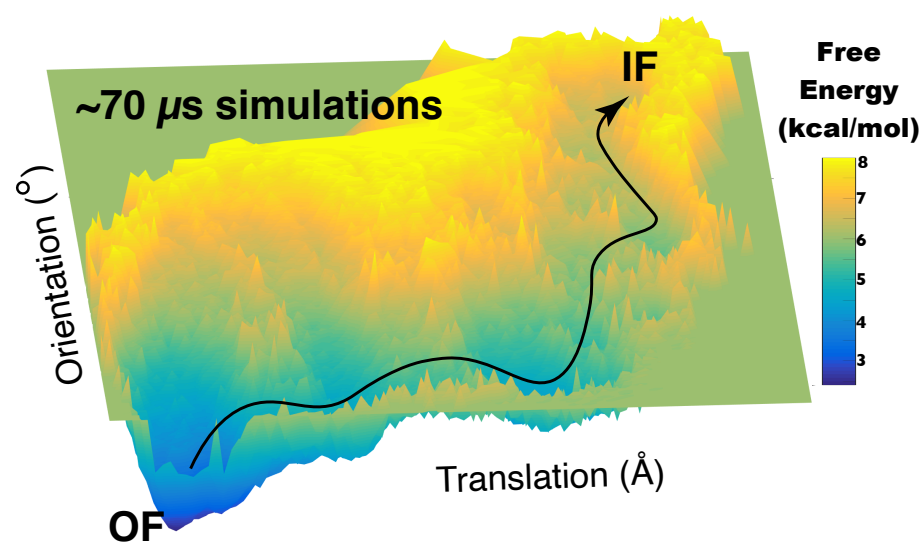

# Lipid Protein Interaction

# Characterizing Energy Landscapes Associated with Functional Motions of Proteins

Outward-facing (OF) to Inward-facing (IF) Transition

Moradi and Tajkhorshid PNAS 2013  
Moradi, ..., Tajkhorshid Nat. Comm. 2015  
Verhalen, ..., Tajkhorshid, Mchaourab, Nature 2017

String method and Bias-exchange  
umbrella sampling

# Molecular Dynamics Simulations

Solving the Newtonian equations of motion for all particles at every time step

Major limitations:

- Time scale / sampling
- Force field approximations

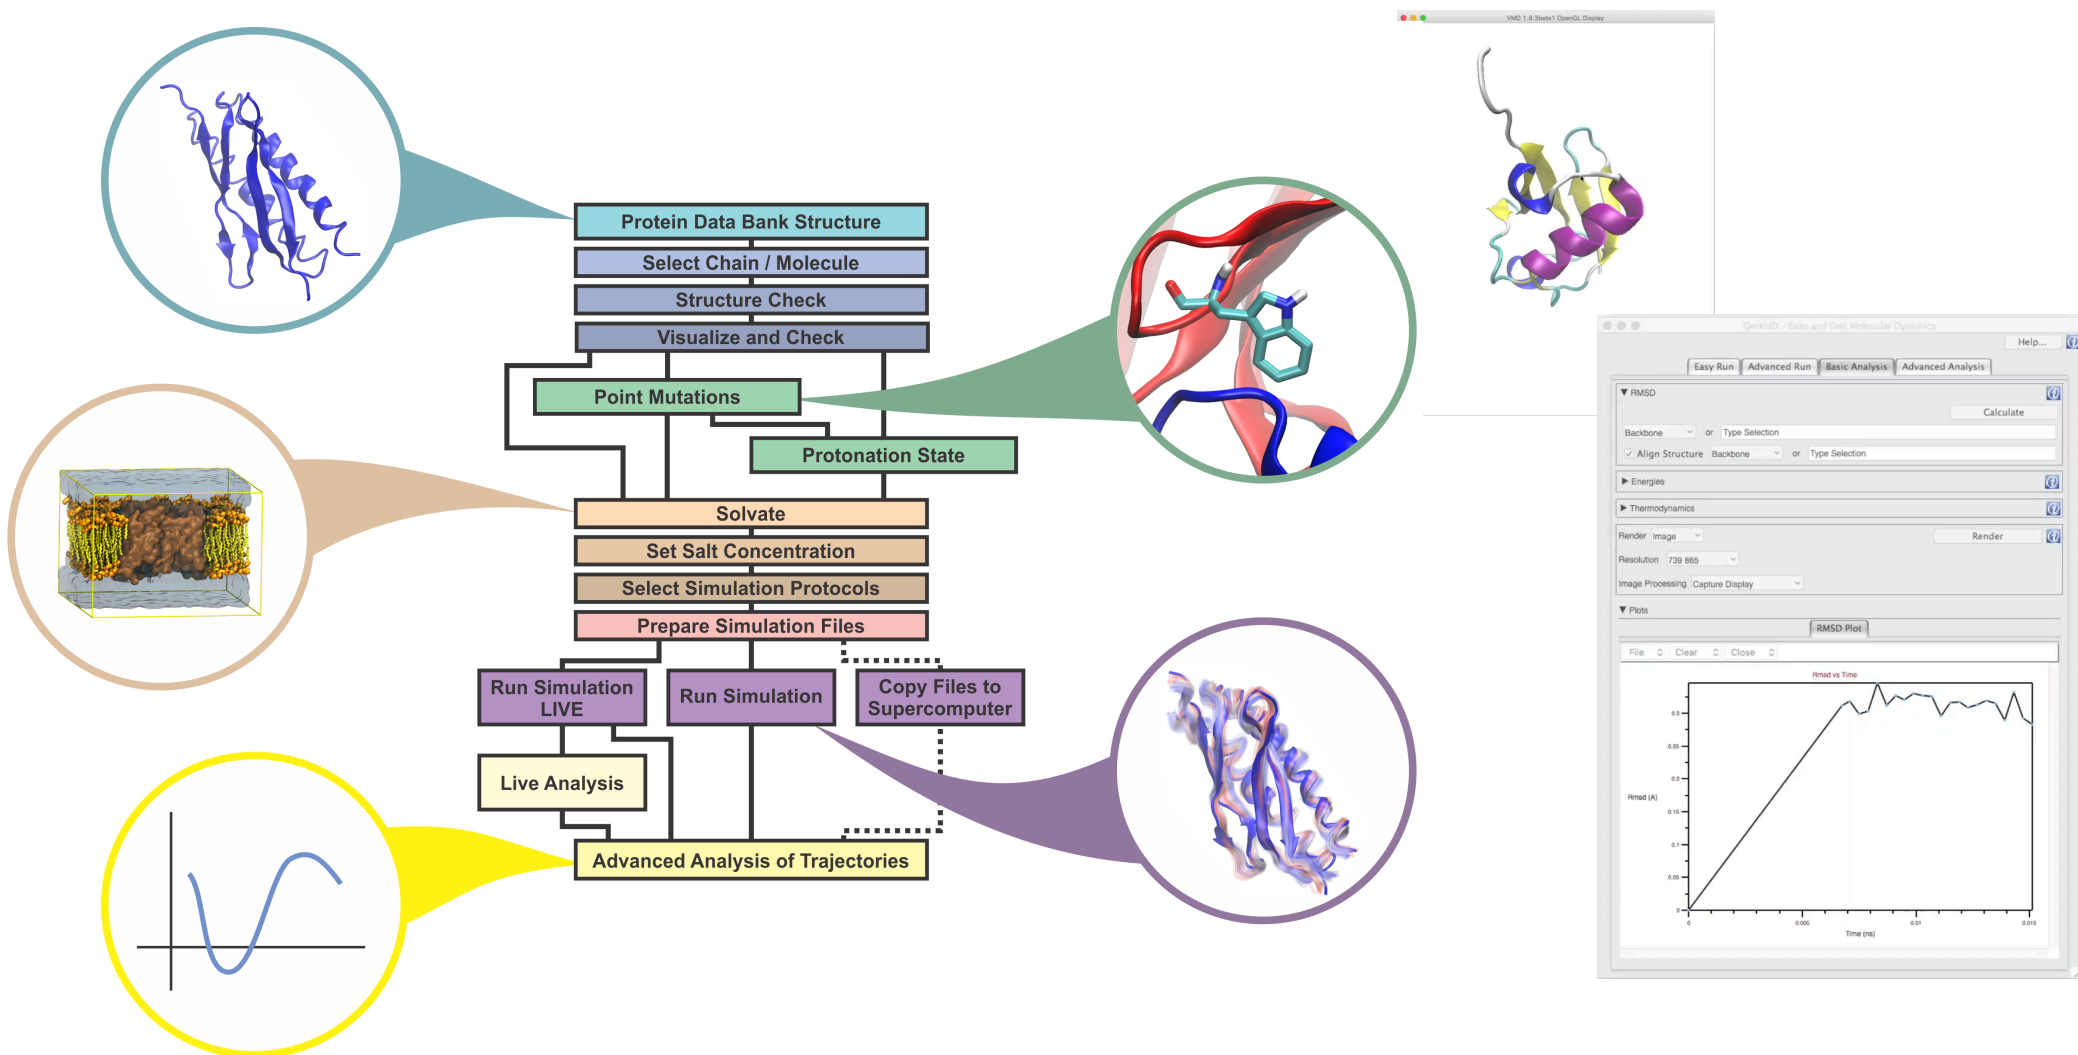

Major advantage:

- Unparalleled spatial and temporal resolutions, simultaneously

**SPEED  
LIMIT**

**1 fs**

# QwikMD- Gateway to Easy Simulation

Ribeiro, J. V., ..., Schulten, K.. QwikMD — Integrative Molecular Dynamics Toolkit for Novices and Experts. *Sci. Rep.* 6, 26536; doi: 10.1038/srep26536 (2016)

# Applications of Computational Methodologies to Cell-Scale Structural Biology

## Using computational methods as “structure-building” tools

All experimental Structural biological approaches heavily rely on computational methods to analyze their data

- NMR
- X-ray
- Electron Microscopy
- ...

Structural model of HIV virus

# Molecular Dynamics Flexible Fitting (MDFF)

Electron  
Microscope

cryo-EM density  
map

(Ribosome-bound YidC)

Match through MD

APS  
Synchrotron

crystallographic  
structure

Supercomputer

[2] Trabuco et al. *Methods* (2009) 49:174-180.

# Technology Made Highly Accessible to the Community

## interactive MDFF

Developed primarily for experimental users

**113 million** Martini particles  
representing **1 billion** atoms

<u>Protein Components</u>	<u>Copy #</u>
● Aquaporin Z	97
● Copper Transporter (CopA)	166
● F1 ATPase	63
● Lipid Flipase (MsbA)	29
● Molybdenum transporter (ModBC)	130
● Translocon (SecY)	103
● Methionine transporter (MetNI)	136
● Membrane chaperon (YidC)	126
● Energy coupling factor (ECF)	117
● Potassium transporter (KtrAB)	148
● Glutamate transporter (Glt <sub>TK</sub> )	41
● Cytidine-Diphosphate diacylglycerol (Cds)	50
● Membrane-bound protease (PCAT)	57
● Folate transporter (FolT)	134
